## **Customer Reviews**

Love it. I just started working in the Cath lab. Very informative for a nurse or RCIS CV tech. My husband is a cardiologist thinks it is a good book for Cath lab personnel.

Great book with a lot of useful information. Wish it had more techniques for echocardiographers like myself who,s a bit confused when going to cath lab, but so much information on disease process and new technologies.

I recently started working as an RN in the cath lab and this book has been an amazing asset. It explains many of the diagnostics such as IVUS and FFR as well as interventions like Rotoblator. I

highly recommend this book for cath lab staff.

Great resource! I am currently shadowing in Cath Lab and this book has helped me through things that we encounter. I recommend this to anybody who is considering working in the Cath Lab!

This is a great resource, I borrowed a friends copy and ordered Anderson's CEUs online (32credit hrs). When I returned the book I realized I needed my own copy.
