Okay, first some background: I am new to trading forex but have been trading stocks and options for over 5 years. Aspects of the forex market are very intriguing (24 hour trading, a small 'universe' of currencies to watch vs. thousands of stocks/options, leverage, etc.) so I was looking for a book that would tell me more about the forex market and provide a good foundation to trade successfully. Let me state from the outset that the editing indeed leaves much to be desired. Typos, letters or spaces left out and smallish charts that forces one to bring out a magnifying glass at times. But none of this has anything to do with the value of the content of the book. Anyone dismissing this book simply due to editing are 'missing the forest for the trees,' as the saying goes. But the minor editing

blunders are unfortunate and are the reason for only 4 stars instead of 5. Content pros: a) Very bite-sized chapters help encapsulate topics nicely. You can focus on one thing at a time to insure that you 'get it' before moving on. And everything builds upon the preceding chapters fairly smoothly, so it works. b) True to her premise, this is NOT another missive on all the possible technical indicators available to use. (If you want that, I suggest Murphy's tome on Technical Analysis.) Instead, she is clearly outlining some of the key tools that she uses to trade forex and provides adequate reasoning for her choices. She does not dismiss other indicators as not being useful - she simply seems to have found that following a simple system with these tools works for her. And I would have to agree that it is easy to become bogged down in 'indicator paralysis' and I find her simplicity refreshing.
